

Transportation & Logistics

G7 InfoTech Provides
Highly Scalable Supply Chain Solutions

 **InfoTech**
Delivers Value to Drive Relationship

Transportation & Logistics

In this global economy, the expectations of customers have increased with changing supply chain dynamics resulting in lower lot sizes, more frequency of deliveries, increased service time and frequency expectations, shorter product life cycles and stringent inventory norms. To overcome these challenges technology has become a key for Logistics Service Providers (LSP's) to survive in stiff competition and retain customers.

G7 InfoTech provides highly scalable supply chain solutions to address the needs of logistics and transportation industry, inherent to suite its architecture of multi-client and multi-site framework that makes it easier to manage multiple clients under one roof. It incorporates the breadth of functionality of best-of-breed solutions, yet packaged with an even smaller distribution operation in mind. With its rules-based configurability and rapid implementation, it is a perfect match for operations that demand broad scale functionality.

But, the framework for a quicker and easier implementation exercise suite can run as stand-alone or as an integral component in a global supply chain network.

G7 InfoTech Logistics & Transportation Solutions features and capabilities are universal throughout our entire solution spectrum, providing a uniform and integrated approach to managing supply chain. These foundation capabilities include:

- ❖ Corporate Performance Management(Reporting and Analytics)
- ❖ Radio Frequency Identification(RFID) tracking
- ❖ Workforce Management
- ❖ Activity based Billing

All our solutions are available to our customers using two delivery models: a license-based model, and an on-demand Software-as-a-Service (SaaS) model.

Solutions

- ❖ Warehouse Management System
- ❖ Transportation Management System
- ❖ Container Terminal Management System
